

1. PURPOSE

This policy has been prepared for all subsidiaries and affiliates of Doğuş Holding A.Ş., with the intent to encourage the effective and efficient use of water resources, to reduce water consumption, to minimize environmental and climate change impact in water management, and to ensure full compliance with the applicable legislation.

2. SCOPE

This policy applies to all subsidiaries, affiliates, facilities, offices, and operations of Doğuş Holding A.Ş. in Turkey and abroad.

3. DEFINITIONS

- **Water Efficiency:** The entirety of measures undertaken and practices implemented to ensure the optimal use of water resources and the reduction of water consumption.
- **Water for Human Consumption:** Water used for drinking, cooking, food preparation, or other domestic purposes.
- **Spring Water:** Groundwater that streams from natural springs and is directly bottled without processing.
- **Drinking and Utility Water:** Water suitable for drinking as well as cleaning and domestic use that meets health standards
- **Water Losses:** Water Losses: Physical and commercial water losses that occur during transmission, distribution, or use of water.
- **ISO 14046:** International management standard related to the Water Footprint Reporting System.
- **Environmental Sustainability:** Environmental Sustainability is the practice of institutions and organizations taking necessary measures to minimize their impact on the natural environment while carrying out their business activities and operations, managing their environmental risks, and adopting environmentally friendly production and service processes with the intent to protect ecosystems.

4. CORE PRINCIPLES

In line with its environment and climate change policy, Doğuş Holding manages all its operations in accordance with the following principles to promote the efficient use of water:

- Considers the protection and efficient management of water resources as a fundamental principle of its environmental risk management.
- Regards minimizing water consumption and improving wastewater management among its strategic priorities.
- Manages its water efficiency targets in conjunction with its Environment and Climate Change Policy and Decarbonization Strategy.
- Ensures full compliance with national and international standards and water-related legislation.
- Establishes strategies for subsidiaries and affiliates to improve their water management performance and monitors these activities through various indicators.

5. POLICY COMMITMENTS

a. Water Efficiency Commitments

- To develop effective technologies and best practices to reduce water consumption in business processes.
- To systematically measure, monitor, and report water consumption data.
- To carry out continuous improvement programs to reduce the water footprint.

b. Wastewater Management Commitments

- To implement effective treatment methods to ensure that wastewater is disposed of without harming the environment.
- To encourage recovery and reuse processes.

c. Commitments in Terms of Risk and Opportunity Management

- To analyze risks such as water scarcity and quality deterioration caused by climate change.
- To evaluate opportunities related to water management.

d. Stakeholder Engagement Related Commitments

- To encourage and promote compliance with standards and regulations related to water efficiency throughout the value chain, starting from suppliers.
- To establish collaborations with the community and relevant non-governmental organizations.

e. Legislative Compliance and Monitoring Related Commitments

- To ensure full compliance with the Water Efficiency Regulation and all relevant legislation.
- To ensure the water quality is regularly monitored and the data is duly reported.

6. IMPLEMENTATION OF THE POLICY

In conjunction with its water efficiency policy, Doğuş Holding encourages all its subsidiaries to create their own water efficiency action plans to optimize their water consumption.

Data pertaining to water consumption is disclosed in sustainability reports at least once a year. In risk posing situations, corrective and preventive actions are be implemented.

Doğuş Holding Sustainability Committee is responsible for the coordination and monitoring of water efficiency practices. The monitoring and improvement of the subsidiaries' water management performance are carried out by the relevant department of each company. This policy is reviewed annually, taking into account changes in legislation and international standards.

7. ENFORCEMENT

This Policy was approved by the Board of Directors of Doğuş Holding on 05 August 2025 and publicly disclosed. It enters into force as of the date of its approval by the Board of Directors of Doğuş Holding A.Ş. and is binding for all subsidiaries and affiliated companies. Together with its related procedures, it is reviewed when necessary, updated as required, and the relevant parties are duly informed accordingly.
